

Unique Broadband Systems Ltd. (UBS) is a Canadian multinational, privately owned and operated company that specializes in design, development, manufacturing and life cycle maintenance of complete digital communication systems for voice, video and data in the broadcast, medical and defense industries.

With its head office and 60,000 square feet of facilities located in Toronto, Canada and 30,000 sq ft in Pittsburgh, USA, Unique Broadband Systems Ltd. is well-known worldwide for its strong focus on research and development. Most importantly however, UBS is recognized globally for its uncompromising approach to producing state-of-the-art power amplifiers, transmitters, receivers modulators/exciters, repeaters and an array of passive components and waveguides for satellite, military, digital television, digital satellite radio medical and scientific applications.

Key digital television transmitter solutions are broadcast from UBS Universal Modulator DVU5000 with a robust broadcasting platform to software select DVB-T/H/SH ATSC/CMMB/DTMB/DVB-S/S2, ISDB-T/TB

Mr. Santo Aguanno, UBS Business Development for Medical Devices & Scientific Instrumentation is proud to announce that the initial production release order for equipment relating to X-Ray inspection of cargo has begun.

“UBS’s combination of research, development, technological support and manufacturing capability allowed UBS to be selected for this five year \$1.7 million reoccurring production agreement” says President & CEO, David Dane.

Please reach out and set up a meeting with anyone of the UBS team as they will update you on the latest solutions and technology UBS customers enjoy.
