

Unique Broadband Systems Ltd. (UBS) is a Canadian multinational, privately owned and operated company that specializes in design, development, manufacturing and life cycle maintenance of complete digital communication systems for voice, video and data in the broadcast, medical and defense industries.

With its head office and 60,000 square feet of facilities located in Toronto, Canada and 30,000 sq ft in Pittsburgh, USA, Unique Broadband Systems Ltd. is well-known worldwide for its strong focus on research and development. Most importantly however, UBS is recognized globally for its uncompromising approach to producing state-of-the-art satellite, military, television, radio and medical communication equipment, such as power amplifiers, transmitters, receivers, modulators and an array of passive components/waveguides. Key Satellite ground stations and components serve the Ka, Ku, X, C, S, L band frequencies.

UBS's President & CEO, David Dane is proud to announce the recent award of \$350,000. Technology to support the world wide market contract will include but not be limited to Magnetic Resonance Imaging amplifiers product ranging from 14.2 MHz to 42.6 MHz to cover the majority of mid-field (0.3 Tesla to 1.0 Tesla) Magnetic resonance applications. Ms. Kiran Hirpara, UBS, P.Eng, PMP, was instrumental in the contract award and will manage the process over its 18 month duration.

Please reach out and set up a meeting with UBS Medical & Scientific director, Santo Aguanno as he will update you on the latest solutions and bring your team up to speed on the medical technology UBS customers enjoy.
